

Conveyor and process belts Your partner for food safety for meat, poultry and seafood

HACCP Conveyor and process belts for meat, poultry and seafood

CHIORINO manufactures conveyor and process belts that fully comply with the latest european and international Food Regulations, and particularly recommended for HACCP system.

Certified Food Compliance

To protect Consumer's health, CHIORINO process and conveyor belts comply with the latest european and international Food Regulations:

REGULATION EC 1935/2004 and amendments

REGULATION EC 2023/2006 and amendments

REGULATION EU 10/2011 and amendments

FDA (Food and Drug Administration)

The careful selection of raw materials, the constant adjustment by R&D Department to the legislative developments in food safety, the strict controls throughout the production process (Good Manufacturing Practices) guarantee total food compliance of CHIORINO belts.

Declarations of compliance as prescribed by law are available for every CHIORINO food belt.

Thus, the Customers are certain to use materials that fully comply with the HACCP system.

Key features

Excellent resistance to cut and abrasion

Superior resistance to most aggressive fats and oils

No edge fray

Very high flexibility

Benefits

Long life even with scrapers

Highest reliability and increased belts life

No contamination by fibres

Knife edge. Energy saving

At the forefront of hygiene and food safety

Benefits

- Total respect of the HACCP system
- Easy to clean
- Time, water and energy saving
- Long working life

Resistance to hydrolysis

The HP® belts guarantee an excellent resistance to hydrolysis as well as the chemical and mechanical action of washing with hot water and steam, including in continuous systems.

Resistance to oils and chemical agents

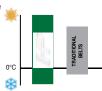

The HP® belts ensure an excellent resistance to the chemical agents, fats and aggressive oils, including palm and coconut oil.

Resistance to high/low temperatures

The HP® belts offer increased resistance to high temperatures compared to traditional polyurethane

belts and maintain their characteristics even at lowest temperatures.

Superior flexibility and mechanical resistance

The HP® belts offer a superior flexibility and are extremely resistant to abrasion and mechanical stress

caused by knife edges, backflexing and scrapers.

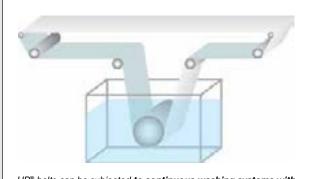

HAGGEP

Extraordinary resistance to cleaning systems

Thanks to the high resistance to hydrolysis, HP® belts do not undergo deterioration due to the "Clean-in-Place" washing and sanitization processes with warm water, steam, foam and aggressive detergents. The User can benefit of belt's long service life and significant costs reduction.

Moreover, compared to modular belts, HP® belts offer considerable water, time and energy saving and ensure higher hygiene levels since all food scraps can be easily removed during cleaning and sanitization phases.

HP® belts can be subjected **to continuous washing systems with hot water and detergents** without undergoing any deterioration.

PRO CHLEAN™

PRO CHLEAN™ sealed edges can be made either on monoply or multiply conveyor belts.

Benefits

- Total food safety and hygiene
- Clean in place systems
- Knife edge running
